

Amanda M. Cook

cook@astro.utoronto.ca
astro.utoronto.ca/~cook

EDUCATION	Ph.D. Astronomy and Astrophysics , University of Toronto, Toronto ON 2025 Thesis Title: “ <i>Fast Radio Burst Statistics in Space and Time</i> ” Thesis Supervisors: Prof. Gwendolyn Eadie, Prof. Bryan Gaensler, Prof. Paul Scholz
	B.Sc. First Class Honours in Mathematics and Physics McGill University, Montreal QC 2019 Thesis Title: “ <i>Survey for Repeating Radio Transients with CHIME/FRB</i> ” Thesis Supervisors: Prof. Victoria Kaspi, Dr. Ziggy Pleunis
EXPERIENCE	Postdoctoral Fellow , McGill University & Universiteit van Amsterdam 2025 Supervised by Prof. Jason W. T. Hessels <ul style="list-style-type: none">• Using FRBs as probes of circumgalactic media• Leading analysis and writing for CHIME/FRB’s fourth repeater catalog• Developing baseband analysis pipeline for CHORD/FRB Visiting Astrostatistics Researcher , Canadian Statistical Sciences Institute (CANSSI) 2023 Supervised by Prof. David Stenning, Prof. Derek Bingham <ul style="list-style-type: none">• Collaborated on astrostatistics methodology with experts at Simon Fraser University• Wrote paper submitted to the Annals of Applied Statistics• Visit was sponsored by a ‘Collaborative Research Team’ grant from CANSSI Undergraduate Researcher in High Energy Astrophysics , University of Kyoto 2019 Supervised by Prof. Teruaki Enoto <ul style="list-style-type: none">• Developed periodicity search pipeline for archival NICER observations of neutron stars which had a reported period from radio observations but had not yet been seen to emit periodically in X-ray emission. Student Intern , Caltech & NASA Jet Propulsion Labs 2018 “X-ray Monitoring of Magnetar PSR J1622-4950”/“All-Sky Survey for Radio Transients” Supervised by Dr. Walid Majid <ul style="list-style-type: none">• Conducted multi-wavelength analysis of magnetar following its reactivation in radio emission using X-ray data from NICER and gamma-ray data from Fermi-LAT. Analysis included periodicity searches and maximum likelihood region modeling• Assisted a team developing an efficient processing pipeline to search for FRBs in archival data from the Deep Space Network Undergraduate Researcher , McGill University 2017 “Gamma-ray Astrophysics with Fermi-LAT” Supervised by Prof. Ken Ragan <ul style="list-style-type: none">• Investigated astrophysical objects and systems of interest to VHE observatories using Fermi-LAT data and analysis tools. Analysis included pulsar timing, spectral energy distribution modelling and maximum likelihood fitting of gamma-ray photon event data.
AWARDS	Walter C. Sumner Fellowship – National, \$16,000, Research, 2022-2024 NSERC Brockhouse Prize , <i>as member of CHIME/FRB</i> – National, Research 2022 NSERC PGS-D – National, \$82,000, Research 2022-2025 AAS Lancelot M. Berkley award , <i>as member of CHIME/FRB</i> – International, Research 2022 Dunlap Institute ‘You got us through 2022’ Award – for my service as the president of the UofToronto Graduate Astronomy Students Association 2022 Ontario Graduate Scholarship – Provincial, \$15,000, Research 2021 Dunlap Student Training Grant <i>to attend Penn State Astrostats Summer School</i> 120 USD 2021 Dunlap Institute Seed Funding <i>as a member of LUVS</i> – Institutional, \$67,182, Research 2021

	Dunlap Institute Seed Funding as a member of <i>LUVS</i> – Institutional, \$26,046, Research	2020
	Governer General’s Innovation Award , as member of <i>CHIME/FRB</i> – National, Research	2020
	Student Internship Stipend , JPL/Caltech – Institutional, \$8000, Research	2018
	Student Poster Award , Canadian Undergraduate Research Conference – Communication	2017
	Undergraduate Student Research Award , NSERC – National, \$4500, Research	2017
	Undergraduate Research Award , McGill University – Institutional, \$1625, Research	2017
	Supplement de NSERC USRA , Fonds de recherche du Québec – Provincial, \$2000, Research	2017
	Higher Education Award , Enbridge – Institutional, \$6900, Academic	2015
	Rutherford Scholarship , Government of Alberta – Provincial, \$2500, Academic	2015
OBSERVING PROPOSALS (AS PI)	‘Simultaneous XMM-Newton and Radio observations of Repeating FRBs’ Submitted as PI to <i>XMM-Newton</i> AO-21. Time Awarded: 42ks	2021
	FRB 20220912A High-Urgency Target of Opportunity, Submitted as PI to <i>Swift</i> . Awarded two visits, 24 hours apart to provide simultaneous exposure to CHIME/FRB.	2022

COLLAB. PUBLICATIONS	[5] CHIME/FRB Collaboration (2023). CHIME/FRB Discovery of 25 Repeating Fast Radio Burst Sources, <i>The Astrophysical Journal</i> , Volume 947, Issue 2, id.83, 31 pp. (83 citations) <i>Individual Contribution:</i> I defined the sample for publication by developing a method to characterize probability of chance coincidence of each of the candidate repeaters. This quantifies the likelihood that each cluster of bursts with positions consistent within errors would be physically unrelated to one another. For CHIME, a telescope with uneven exposure on the sky and significant uncertainties in burst localization, this is a non-trivial problem with consequences for modelling and follow-up efforts. This work included the practical implementation of the methodology and writing sections of the paper.	
	[6] CHIME/FRB Collaboration (2021). The First CHIME/FRB Fast Radio Burst Catalog, <i>The Astrophysical Journal Supplement Series</i> , Volume 257, Issue 2, id.59, 41 pp. (386 citations) <i>Individual Contribution:</i> I maintained and developed software within CHIME/FRB’s realtime pipeline, including the ‘known source sifter’ which identifies any associated sources with each detected pulse, and the L4 pipeline, which coordinates, for each detected pulse, the actions taken by the system (intensity/baseband callbacks, community notifications) according to the science priorities of the team. In addition, I helped classify signals to discriminate between real and non-astrophysical during regular monitoring shifts for the experiment. I also measured physical parameters (burst widths, fluences, etc) for a subset of the bursts.	

- [7] **CHIME/FRB Collaboration** (2020). A bright millisecond-duration radio burst from a Galactic magnetar, *Nature*, Volume 587, Issue 7832, p.54-58 (628 citations)
Individual Contribution: I crafted the argument confirming the FRB's measured DM was consistent with having originated from the magnetar, using free electron models of the Galaxy and the magnetar's X-ray absorbing column density. This evidence was essential to our paper claiming we had detected the first FRB with known progenitor—a Galactic magnetar.

TEACHING	<p>Graduate Teaching Assistant, University of Toronto 2019-2023</p> <p>As a Teaching Assistant:</p> <ul style="list-style-type: none"> • Creating and leading weekly tutorials and coding workshops • Holding office hours and offering assistance with lab report completion <p>As the Head Tutorial TA for the largest course in North America:</p> <ul style="list-style-type: none"> • developed tutorial content for students • developed material about effective online teaching during the 2020 pandemic • managed a team of more than a dozen TAs and led weekly preparation meetings <p>Course topics include practical/observational astronomy, stellar astrophysics, radiation, and cosmology for third year students in the astronomy specialist program and observational astronomy for non-astronomy students (AST 326, AST 301, AST 320, AST 101, AST 201, AST 101).</p> <p>Grader, (MATH 325) McGill University 2018</p> <p>Supervised by Prof. Antony Humphries</p> <ul style="list-style-type: none"> • Responsible for grading assignments, creating solution sets, and submitting students' marks for an upper year honours ordinary differential equations course.
SERVICE	<p>Referee since 2024</p> <p>I regularly accept requests to serve as a peer reviewer for leading astronomy journals, including <i>Astronomy & Astrophysics</i> and the <i>Astrophysical Journal</i></p> <p>Collaboration Member, CHORD/FRB Since 2024</p> <p>Roles/Responsibilities include:</p> <ul style="list-style-type: none"> • Pipeline Developer: Writing the analysis pipeline that will be used to process baseband data from CHORD/FRB <p>Co-Chair Annual Fast Radio Burst Conference "FRB 2025" 2024–2025</p> <p>In a duo of co-chairs, proposed for, and was awarded, the privilege to host the next edition of the annual FRB conference. This will be a five-day international hybrid meeting in July 2025 with an expected attendance of 200. Includes oversight of a scientific and local organizing committee with 24 total members.</p> <p>Collaboration Member, CHIME/FRB Since 2019</p> <p>Roles/Responsibilities include:</p> <ul style="list-style-type: none"> • System Admin: Address issues escalated by system monitors and assist the system/science experts to help resolve system issues. • Pipeline Expert: maintenance and continued development of number of pipelines and software 'actors' within the telescope, including the 'known source sifter' which identifies any associated sources with each detected pulse in real time, the L4 pipeline, which coordinates, for each detected pulse, the actions taken by the system (intensity/baseband callbacks) according to the science priorities of the team and stores a database of astrophysical events • Convener of biweekly "Counterparts Working Group" (2020-2024) and "Probes Working Group" (since 2024) meetings, oversee relevant projects <p>Chandra Peer Review Time Allocation Committee Member Center for Astrophysics 2024</p> <p>Reviewing proposals for target of opportunity observations for Chandra Cycle 26</p> <p>Instrumentation Summer School Admissions Committee Dunlap Institute 2023</p>

Reviewed candidate’s application material and made admissions rankings, allocated available travel funds.

Local Organizing Committee Member Dunlap Institute & CHIME/FRB 2023
“Multi-wavelength follow-up of fast radio bursts in the era of routine (sub)arcsecond localizations”, a two-day hybrid meeting in April 2023 with invited plenary talks and discussion groups.

Public Outreach Volunteer Dunlap Institute/University of Toronto 2019-2024

Highlights include:

- Invited guest speaker at Cawthra High School STEM conference
- Filmed three episodes of ‘Cosmos on your Couch’, a YouTube series aimed at non-astronomers
- Hosted a panel of experts to speak about the Ethics of Space Colonization at the Dunlap Institute’s 2021 ‘Planet Party’. This event drew 2.3k viewers.
- Multiple appearances as a panelist for becoming an astronomer for students at the high school to senior undergraduate level.

Executive Committee, President, Graduate Astronomy Students Association, DADDAA 2021-2022

- Assisted in organizing opportunities for graduate students to meet candidates and collating the student’s feedback for three astronomy faculty hires.
- Negotiated a \$5.3k (19%) stipend increase for graduate students, the largest in department history
- Acted as advocate for graduate student interests and as a liaison between graduate students and astronomy department executives. Priorities included student mental health and ensuring PhD success in the final months of and return from large-scale COVID-19 isolation
- Acted as department student representative for prospective and incoming graduate students

Executive Committee, Secretary, Graduate Astronomy Students Association, DADDAA 2020-2021

Editor, Delta Epsilon, McGill Journal of Undergraduate Mathematics 2017-2019

Graduate Student Mentor University of Toronto 2020-2022

- Provided support and mentorship for three undergraduate students and a graduate student.

Public Outreach Volunteer Astro McGill 2017-2019

- Assisted in the execution of astrophysics public outreach talks and events such as the “Public Astro Night” lecture series and the solar eclipse watch party.

COMPETENCES **Languages** English (*native*), French (*B2*)

Techniques Python, R, \LaTeX , bash, git, basic mathematica, and Matlab
